If you weren't one of the lucky ones who were able to attend the [cf.Objective\(\)](#) Pecha Kucha BOF in April of this year, you can still have a chance to see these nine fantastic presentations. The event turned out to be just as fun and interesting as I had hoped, which is entirely thanks to the hard work of the presenters. Fortunately [Michael Canonigo](#) recorded all but one of the presentations, and [Anthony Israel-Davis](#) managed to somehow magically record his own, so they are all available for viewing via YouTube.

I've created a [YouTube playlist](#) that you can watch to see the intro followed by all nine of the presentations, or, if you want to check them out one at a time they are each linked to their respective speaker below.

- [Steve Withington](#)
- [Matt Woodward](#)
- [Mike Henke](#)
- [Charlie Arehart](#)
- [Doug Hughes](#)
- [Curt Gratz](#)
- [Anthony Israel-Davis](#)
- [Dan Wilson](#)
- [Ben Nadel](#)

Thanks again to all of the speakers and all who attended. Hopefully this can become a regular event at cf.Objective() and even possibly at other conferences.
